PROJECTS

Omnifood – “Never Cook Again”

E-Commerce Website

- Designed a responsive e-commerce website using HTML, CSS, and JavaScript.
- Implemented with animations and smooth UI transitions.
- Focused on clean design and cross-device compatibility.

Pest Detector Website

- Developed a web app using Python (Flask) and ML to detect pests from images.
- Designed an interactive frontend using HTML, CSS, and JavaScript.
- Helps farmers identify pests quickly and accurately.

Breed Detection System

- Created an ML model to identify cattle breeds from images.
- Used feature extraction and classification algorithms for accuracy.
- Supports digital livestock record-keeping for farmers.
